Wellness Workbook

WHAT ARE THE CHAKRA'S?

Chakras are energy centers within the body that are believed to regulate our physical, emotional, and spiritual well-being. The word "Chakra" comes from the ancient Sanskrit language and translates to "wheel" or "disk," symbolizing the way energy spins and flows through these centers.

Each Chakra corresponds to specific areas of the body, and they are thought to influence various aspects of our lives, from basic survival and emotional expression to intuition and higher consciousness.

There are seven primary Chakras aligned along the spine, from the base of the spine to the top of the head:

- **Root Chakra (Muladhara):** Located at the base of the spine, this Chakra is associated with feelings of safety, stability, and grounding.
- **Sacral Chakra (Svadhithana):** Situated just below the navel, it governs creativity, passion, and emotional balance.
- **Solar Plexus Chakra (Manipura):** Found in the upper abdomen, it relates to personal power, self-confidence, and self-discipline.
- **Heart Chakra (Anahata):** Positioned in the center of the chest, it influences love, compassion, and emotional connection.
- **Throat Chakra (Vishuddha):** Located at the throat, it deals with communication, self-expression, and truth.
- **Third Eye Chakra (Ajna):** Situated between the eyebrows, this Chakra is associated with intuition, insight, and mental clarity.
- **Crown Chakra (Sahasrara):** Found at the top of the head, it represents spiritual connection, enlightenment, and a sense of unity.

When these Chakras are balanced and open, energy flows freely, promoting well-being and harmony. However, blockages or imbalances can lead to physical ailments, emotional challenges, or a feeling of disconnection.

Chakra work, which involves meditation, visualization, affirmations, and other holistic practices, aims to balance these energy centers, helping individuals achieve greater wellness and inner peace.
