

STARS START

What do you think stardust looks like? Can you draw stars?

After the Big Bang, stars were born from clouds of gas.

STARS START

After the Big Bang, stars were born
from clouds of gas.

After the Big Bang, stars
were born from clouds of
gas.

After the Big Bang,
stars were born from
clouds of gas.

After the Big Bang,
stars were born from
clouds of gas.

Gravity pulled gas and dust together to form the first stars, lighting up the early universe.

Gravity pulled gas and dust together to form the first stars, lighting up the early universe.
