

TRIPLE PLAY

Materials:

- Two D10 (10-sided die)
- Two different colors (markers, crayons, or pencils)

Instructions

- On your turn, roll both D10 and multiply them together. Cross out that box on the 100s chart.
- Your goal is to have three boxes in a row.
- Eventually, someone will get a number that's already been played. When this happens, they get to put their x ANYWHERE on the board.
- The winner gets three in a row, three times.

Variations

- **Easier Version:** Play with a D10 and a Percentile Dice (one that has 10, 20, 30, etc). The percentile dice is the tens place and the D10 is the ones place.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
