

# RAD CHARACTER DESIGN

## Facial Expression

What makes a difference in our facial expressions?

It is how we express our **eyes**, **eyebrows**, and the **mouth**.

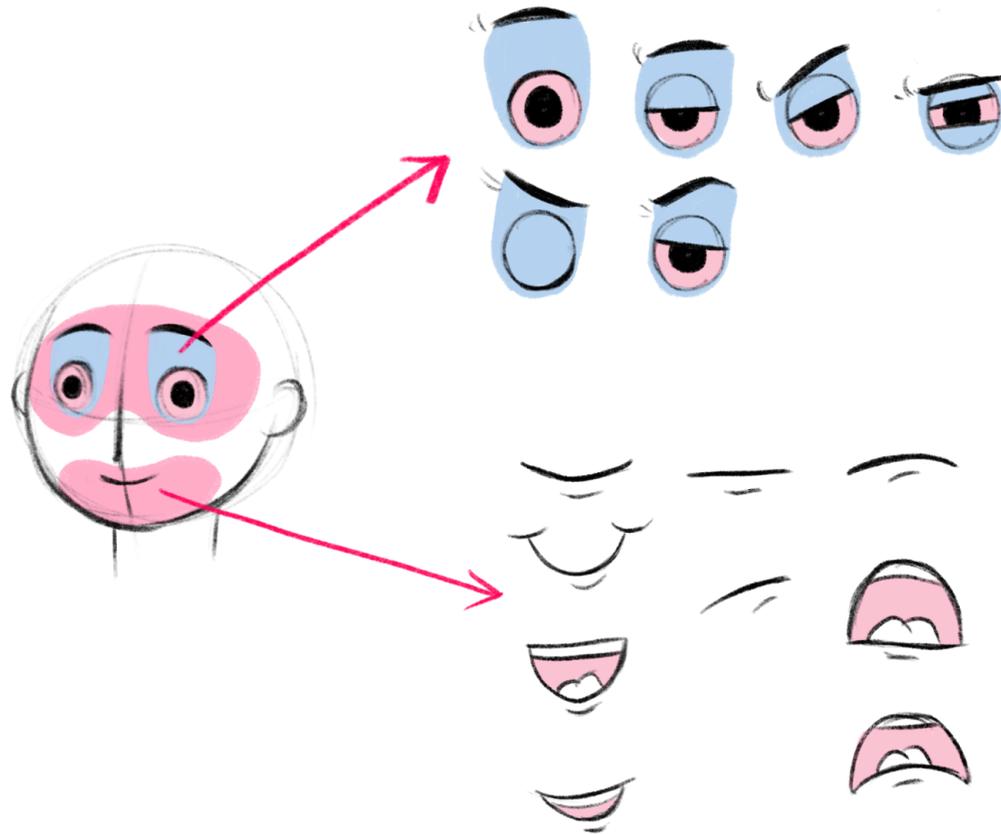

John Singer Sargent

It is mainly where the **upper part of the eyes & the eyebrows** are placed that makes the biggest difference in facial expression.

Also, **the mouth** adds an additional expression to the eyes and eyebrows that gives a strong impression of the character.

The BEST way to know facial expression is to LOOK IN THE MIRROR!

Look at your own face while adding makeup and look at your face as you are adding expression to your characters and PRACTICE, PRACTICE, and PRACTICE! We cannot emphasize more on PRACTICE!

## Facial Expression Sheet Illustrated by Ge

Feel your emotions and express it in your face and in your body! Our body is all connected to each other. If you feel happy or sad, that expression will show in your body as well. So act your expression in the mirror and start drawing it into your characters!
