

## Color Study Exercise

### Color Study Instruction

1. Create your own color wheel.

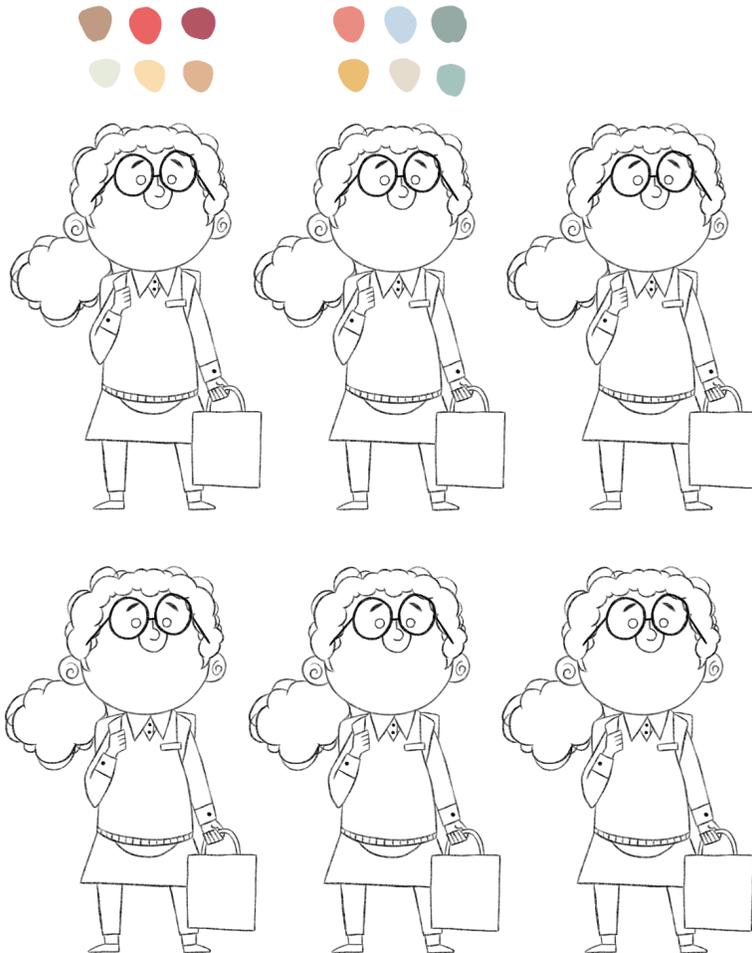

2. Take one of your character sketches and start applying some of the information that we learned in this week's lecture.

## Color Experimentation Instruction

1. Use the character that we provided (the girl spot illustration below illustrated by Ge) or use your own spot illustration to color experiment (Make sure to work with the colors provided).
2. Complete 5 color experimentation.  
Two color palettes will be provided by us, but the other three color palettes will be your choice. Don't rush and think about the best color combination to create color harmony.  
→ People who are coloring using traditional media will have the freedom to choose any color palettes of their own.
