

LABEL THE WATER CYCLE

Draw the water cycle inside the bag outline below. Add labels for: SUN, EVAPORATION, CLOUDS, RAIN, OCEAN.

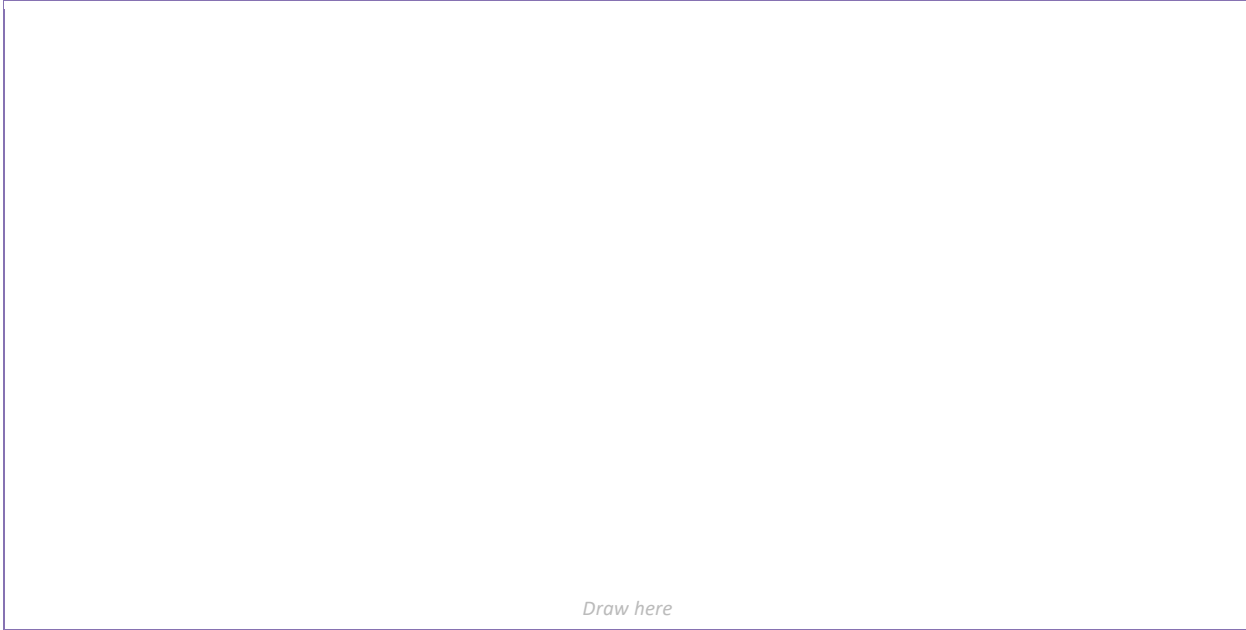

MY PREDICTION

I think the water droplets on the sides of the bag will be:

- BLUE
- CLEAR
- GREEN

WHAT I OBSERVED

Draw what your bag looked like after sitting in the sun:

Draw here

CIRCLE THE RIGHT ANSWER

- o The droplets on the side were: BLUE / CLEAR
- o This is because when water evaporates, it leaves the _____ behind.

I LEARNED THAT

The water cycle has four steps: _____, condensation, _____, and collection.

Rain water is fresh because evaporation leaves _____ behind in the ocean.

THE CHECKLIST

Is it Alive?

- Grows**
- Uses Energy**
- Reproduces**
- Made of Cells**
- Responds to Environment**

Alive **Not Alive**

MY TRICKIEST OBJECT

Which object was hardest to decide? Draw it and write why it was tricky.

Write or draw here

I LEARNED THAT

Living things must _____, use energy, reproduce, be made of _____,
and respond to their environment.
