

**BEFORE WE BUILD**

Circle what you think the inside of Earth looks like:

- ALL SOLID ROCK
- ALL LIQUID
- LAYERS LIKE AN ONION
- HOLLOW

**MY EARTH MODEL**

Draw a circle and color in the layers of your play dough Earth. Use the same colors you used.  
Label each layer with its name.

*Draw here*

**MATCH IT**

Draw a line from each layer to its description:

- |            |                                      |
|------------|--------------------------------------|
| CRUST      | The hottest, densest center          |
| MANTLE     | Where we live                        |
| INNER CORE | The thickest layer, slow-moving rock |

**I LEARNED THAT**

Earth has \_\_\_\_\_ main layers.

---

The layer we live on is called the \_\_\_\_\_.

---

The hottest part is the \_\_\_\_\_.

---
