# HOW A RIVER BECOMES CURVED

FLIP BOOK

GLUE OR STAPLE HERE

As a river flows downhill, it is not perfectly straight. Small bends begin to form.

**1**

**First**

GLUE OR STAPLE HERE

Water moves faster on the outside of each bend. This fast water wears away soil and rock, making the outside edge wider.

**2**

**Next**

GLUE OR STAPLE HERE

Water moves slower on the inside of the bend. It drops sand and soil there, building up new land

**3**

**Then**

GLUE OR STAPLE HERE

Erosion on the outside and deposition on the inside keep happening. The bends get bigger and bigger until the river becomes very winding, called meanders.

**4**

**Last**

**1** Complete with the steps of how rivers became curved overtime (draw/write).

**2** Cut the boxes and glue them in order.

# HOW A RIVER BECOMES CURVED

# PUTTING TOGETHER A FLIPBOOK

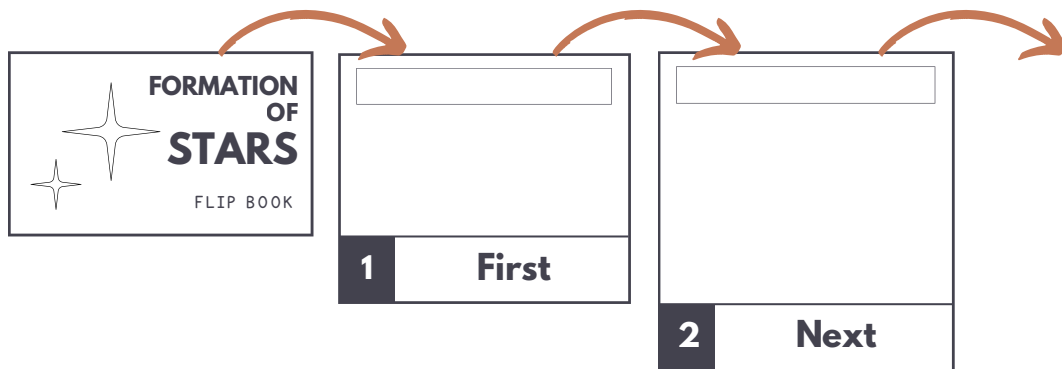

## FLIP BOOK

**1** Ask learners to complete the steps.

**2** When they finish ask them to cut the 5 boxes (pages) of the Flip Book.

**3** Tell students to glue or staple the pages together, one onto the other, following the numbers.

**4** The Flip Book will look like this:
